

Searching for Industrial Refrigeration Parts Via EasyParts

One of M&M's suppliers has an easy tool to search for STAL, Sabroe, and Gram parts for servicing compressors called [EasyParts](#). Please note that if you start a shopping cart, JCI Denmark will forward it to our Parts Department.

Steps to start a search:

1. Open website for [EasyParts](#).
2. If you know what part you are looking for, type in the number exactly how it appears in the manual in the search bar located in the top right corner. If you do not know the part number, give us a call.

**Note that STAL and Sabroe Screw compressors are out of production and the manuals have not been updated with current part numbers. Also, if there are redundant parts that exist in Gram, STAL and even some Danfoss, parts lists will be replaced with Sabroe part numbers.*

3. Once you click search, your part should appear. If the number in your manual is not current, a "substitute" number will appear next to your searched number. Please use this for reference when requesting a quote.
4. Click on the most current part number to search for what kits the part is used in. This prevents having to search for each item individually and kits offer cost savings compared to ordering each item individually.
5. There is the option of saving the kit information as a PDF with photos to compare current parts to replacement parts. Click PDF icon and select "export list with images". This can also be saved for future reference.

When selecting parts via [EasyParts](#), always make sure to compare the dimensions and POS numbers to be sure you are ordering the correct item. **Please do not hesitate to contact us to assist you with any of your parts ordering needs.** We can be reached at (410) 754-8005 or parts@mmrefrigeration.com.
